

InteX Research Lab - Project Details

Transfer Learning-Based Skin Cancer Classification Using MobileNetV2, ResNetV2, and

Year: 2024

Researchers: Mahfuz Ahmed, Bayazid Shanto

Supervisors: Md Sabir Rahman Khasrow

Description:

This study benchmarks multiple transfer-learning architectures for skin-lesion analysis. The comparison emphasizes accuracy, robustness, and deployment feasibility, aiming to provide practical model guidance for real-world medical imaging settings.
